⁽¹⁾ The information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund. For the financial period ended December 31, 2013, no purchases or sales of portfolio securities were made in the Fund. As a result, the portfolio turnover ratio for this period was zero.

⁽⁴⁾ The information in this column is for the period beginning December 2, 2013 (the class' inception date) and ending December 31, 2013.

⁽⁵⁾ The information in this column is for the period beginning October 1, 2014 (the class' inception date) and ending December 31, 2014.

[†] Effective May 1, 2015, the management fee rate was reduced from 1.55% to 1.50%.

^{**} Effective May 1, 2015, the management fee rate was reduced from 1.20% to 1.15%.

Portfolio turnover ratio (%) ⁽³⁾	14.94	73.64	38.96	20.59	—

⁽¹⁾ The information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund. For the financial period ended December 31, 2013, no purchases or sales of portfolio securities were made in the Fund. As a result, the portfolio turnover ratio for this period was zero.

⁽⁴⁾ The information in this column is for the period beginning December 2, 2013 (the class' inception date) and ending December 31, 2013.

⁽⁵⁾ The information in this column is for the period beginning October 1, 2014 (the class' inception date) and ending December 31, 2014.

⁽¹⁾ The information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund. For the financial period ended December 31, 2013, no purchases or sales of portfolio securities were made in the Fund. As a result, the portfolio turnover ratio for this period was zero.

⁽⁴⁾ The information in this column is for the period beginning December 2, 2013 (the class' inception date) and ending December 31, 2013.

⁽⁵⁾ The information in this column is for the period beginning October 1, 2014 (the class' inception date) and ending December 31, 2014.

Financial instrument risk

The Fund invests in the BMO Income ETF Portfolio ("underlying fund"). The investment objective of the underlying fund is to preserve the value of investments by investing primarily in exchange traded funds that invest in fixed income securities with a lesser exposure to exchange traded funds that invest in Canadian, U.S. and international equity securities. The underlying fund may also invest in other mutual funds or invest directly in individual fixed income or equity securities and cash or cash equivalents.

Financial instrument risk of the underlying fund

The Fund is indirectly exposed to currency risk, interest rate risk, other market risk and credit risk through its investment in the underlying fund to the extent the underlying fund was exposed to these risks.

Management expense ratio (%) ⁽²⁾	2.43	2.43
Management expense ratio before waivers (%)	2.43	2.43
Portfolio turnover ratio (%) ⁽³⁾	9.03	7.21

⁽¹⁾ The information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund.

⁽⁴⁾ The information shown in this column is for the period beginning June 21, 2016 (the class' inception date) and ending December 31, 2016.

⁽¹⁾ The information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund.

⁽⁴⁾ The information shown in this column is for the period beginning June 21, 2016 (the class' inception date) and ending December 31, 2016.

75/100 Class A Units	Six months ended June 30, 2017	Year ended December 31, 2016 ⁽⁴⁾
Net assets (\$000's) ⁽¹⁾	4,800	943
Net asset value per unit (\$) ⁽¹⁾	11.01	10.69
Units issued and outstanding (000's) ⁽¹⁾	436	88
Management fees (%)	1.45	1.45
Management expense ratio (%) ⁽²⁾	2.71	2.71
Management expense ratio before waivers (%)	2.71	2.71
Portfolio turnover ratio (%) ⁽³⁾	—	0.07

⁽¹⁾ The information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund. For the financial period ended June 30, 2017, no sales of portfolio securities were made in the Fund. As a result, the portfolio turnover ratio for this period was zero.

⁽⁴⁾ The information in this column is for the period beginning June 21, 2016 (the class' inception date) and ending December 31, 2016.

Financial instrument risk

The Fund invests in the BMO Low Volatility US Equity ETF ("underlying fund"). The investment objective of the underlying fund is to provide exposure to the performance of a portfolio of U.S. stocks with the potential for long-term capital growth. Securities will be selected from the large capitalization U.S. equity universe. The securities that have the lowest sensitivity to market movements (beta) will be selected for the portfolio and they will be weighted so that a higher allocation is given to securities with lower betas.

Financial instrument risk of the underlying fund

The Fund is indirectly exposed to currency risk, interest rate risk, other market risk and credit risk through its investment in the underlying fund to the extent the underlying fund was exposed to these risks.

Management expense ratio (%) ⁽²⁾	2.91	2.92
Management expense ratio before waivers (%)	2.91	2.92
Portfolio turnover ratio (%) ⁽³⁾	4.13	5.93

⁽¹⁾ The information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund.

⁽⁴⁾ The information in this column is for the period beginning June 21, 2016 (the class' inception date) and ending December 31, 2016.

Financial instrument risk

The Fund invests in the BMO Monthly Income Fund, Series I ("underlying fund"). The investment objective of the underlying fund is to provide a fixed monthly distribution and to preserve the value of investments.

The Fund invested primarily in Canadian fixed income securities with higher-than-average yields, issued by the federal government, provincial governments, government agencies and corporations as well as preferred and common shares, real estate investment trusts, royalty trusts and other high-yielding investments.

Financial instrument risk of the underlying fund

The Fund is indirectly exposed to currency risk, interest rate risk, other market risk and credit risk through its investment in the underlying fund to the extent the underlying fund was exposed to these risks.

Management expense ratio before waivers (%)	2.75
Portfolio turnover ratio (%) ⁽³⁾	—

⁽¹⁾ The information is provided as at June 30 of the period shown.

⁽²⁾ The management expense ratio of a particular class is calculated based on all expenses allocated to the series, as applicable, including all taxes and interest expenses but excluding brokerage commissions and other portfolio transaction costs, divided by the average daily net asset value of that series, annualized.

⁽³⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of the fund. For the financial period ended June 30, 2017, no sales of portfolio securities were made by the Fund. As a result, the portfolio turnover ratio for this period was zero.

The Company is the sole issuer of the individual variable insurance contract providing for investment in each Fund.

Each Fund is established under the authority of the Insurance Companies Act. Each of the Funds invest in direct investments or in underlying exchange traded funds or mutual fund units.

The individual variable insurance contract provides guarantees, which are payable either on maturity or on death.

The Statement of Financial Position and related notes of each of the Funds are as at June 30, 2017 and December 31, 2016. The Statement of Comprehensive Income, Statement of Changes in Net Assets Held for the Benefit of Policyowners, Statement of Cash Flows and related notes are of the periods ended June 30, 2017 and June 30, 2016.

The financial statements were authorized for issuance by the Board of Directors of the Company on September 6, 2017.

These financial statements should be read in conjunction with the annual financial statements for the period ended December 31, 2016 which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

2. Basis of preparation and presentation

These unaudited interim financial statements have been prepared in accordance with IFRS and in accordance with International Accounting Standard ("IAS") 34 – Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB").

3. Summary of significant accounting policies Financial instruments

The Funds record financial instruments at fair value. Investment transactions are accounted for on the trade date. The Funds' investments are either designated at fair value through profit or loss ("FVTPL") at inception or classified as held for trading. The changes in the investment fair values and related transaction costs are recorded in the Funds' Statement of Comprehensive Income.

Financial assets or financial liabilities held for trading are those acquired or incurred principally for the purpose of selling or repurchasing in the near future, or on initial recognition, are part of a portfolio of identified financial instruments that the Funds manage together and that have a recent actual pattern of short-term profit taking. The Funds classify all derivatives as held for trading. The Funds do not designate any derivatives as hedges in a hedging relationship.

The Funds designate all investments at FVTPL, as they have reliably measurable fair values and are part of a group of financial assets or financial liabilities that are managed and have their performance evaluated on a fair value basis in accordance with the Fund's investment strategy.

The Funds' withdrawable units contain multiple contractual obligations and consequently, do not meet the conditions to be classified as equity. As a result, the Funds' obligations for net assets held for the benefit of policy owners are classified as financial liabilities and presented at the withdrawal amounts.

All other financial assets and financial liabilities are measured at amortized cost. Under this method, financial assets and financial liabilities reflect the amount required to be received or paid, discounted, when appropriate, at the contract's effective interest rate.

The Company has determined that the Funds meet the definition of "investment entity" and as a result, the Funds measure subsidiaries, if any, at FVTPL.

Cost of investments

The cost of investments represents the amount paid for each security and is determined on an average cost basis.

Fair value measurement

Investments are recorded at their fair value with the change between this amount and their average cost being recorded as "Change in unrealized appreciation (depreciation)" in the Statement of Comprehensive Income.

For exchange-traded securities, close prices are considered to be fair value if they fall within the bid-ask spread. In circumstances where the close price is not within the bid-ask spread, the Company determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

June 30, 2017

For bonds, debentures, asset-backed securities and other debt securities, fair value is represented by bid prices provided by independent security pricing services. Short-term investments, if any, are fair valued, and in certain circumstances are held at amortized cost which approximates fair value.

Mutual fund units held as investments are valued at their respective Net Asset Value ("NAV") on each Valuation Date (the "Valuation Date" is each day on which the Toronto Stock Exchange is open for trading), as these values are the most readily and regularly available.

Derivatives

Derivative instruments are financial contracts that derive their value from changes in the underlying interest rates, foreign exchange rates or other financial or commodity prices or indices.

Derivative instruments are either regulated exchange traded contracts or negotiated over-the-counter contracts. The Funds may use these instruments for trading purposes, as well as to manage the Funds' risk exposures.

Derivatives are measured at fair value. Realized gains and losses are included in "Net realized gains (losses)" on the Statement of Comprehensive Income and unrealized gains and losses are included in "Change in unrealized appreciation (depreciation)" in the Statement of Comprehensive Income.

Forward currency contracts

A forward currency contract is an agreement between two parties (the Fund and the counterparty) to purchase or sell a currency against another currency at a set price on a future date. The Funds may enter into forward currency contracts for hedging purposes, which can include the economic hedging of all or a portion of the currency exposure of an investment or group of investments, either directly or indirectly.

The Funds may also enter into these contracts for non-hedging purposes, which can include increasing the exposure to a foreign currency, or the shifting of exposure to foreign currency fluctuations from one country to another. The value of forward currency contracts entered into by the Funds is recorded as the difference between the value of the contract on the Valuation Date and the value on the date the contract originated.

Income recognition

Distributions from underlying funds are recognized on the ex-distribution date.

Interest income from interest bearing investments is recognized in the Statement of Comprehensive Income as it is earned using the effective interest rate. Interest receivable shown in the Statement of Financial Position is accrued based on the interest bearing instruments' stated rates of interest.

Foreign currency translation

The fair value of investments and other assets and liabilities in foreign currencies are translated into the Funds' functional currency at the rates of exchange prevailing at the period-end date. Purchases and sales of investments, and income and expenses are translated at the rates of exchange prevailing on the respective dates of such transactions. Foreign exchange

gains (losses) on completed transactions are included in "Net realized gain (loss)" and unrealized foreign exchange gains (losses) are included in "Change in unrealized appreciation (depreciation)" in the Statement of Comprehensive Income. Foreign exchange gains (losses) relating to cash, receivables and payables are included in "Foreign exchange gain (loss)" in the Statement of Comprehensive Income.

Cash

Cash is comprised of cash and deposits with banks, which include bankers' acceptances and overnight demand deposits. Cash is recorded at fair value. The carrying amounts of cash approximates its fair value because it is short-term in nature.

Other assets and liabilities

Distribution receivable from investment trusts, subscriptions receivable and receivable for investments purchased, are initially recorded at fair value and subsequently measured at amortized cost. Similarly, payable for investments purchased, redemptions payable and accrued expenses are measured at amortized cost. Other assets and liabilities are short-term in nature, and are carried at cost or amortized cost.

Increase or decrease in net assets held for the benefit of policy owners per unit

"Increase (decrease) in net assets held for the benefit of policyowners per unit" of a class in the Statement of Comprehensive Income represents the increase (decrease) in net assets held for the benefit of policyowners attributable to the class, divided by the weighted average number of units of the class outstanding during the period.

Portfolio turnover ratio

The Funds' portfolio turnover ratio indicates how actively the Funds' portfolio manager manages its portfolio investments.

A portfolio turnover ratio of 100% is equivalent to the fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover ratio in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover ratio and the performance of a fund.

Income taxes

The Funds are segregated funds under the provisions of the *Income Tax Act (Canada)*. The Funds' net income, including net realized capital gains and losses for the calendar year, is allocated to beneficiaries so that the Funds will not be liable for income taxes. As a result, the Funds have determined that they are in substance not taxable and therefore do not record income taxes in the Statement of Comprehensive Income and/or recognize any deferred tax assets or liabilities in the Statement of Financial Position.

Investments in subsidiaries, joint ventures and associates

Subsidiaries are entities over which the Funds have control through their exposure or rights to variable returns from their investment, and have the ability to affect those returns through their power over the entity. The Funds have determined that they are an investment entity and as such, they account for

subsidiaries, if any, at fair value. Joint ventures are those where the Funds exercise joint control through an agreement with other shareholders, and associates are investments in which the Funds exert significant influence over operating, investing, and financing decisions (such as entities in which the Funds own 20% – 50% of voting shares), all of which, if any, have been designated at FVTPL.

Unconsolidated structured entities

During the periods, the Funds had no sponsored unconsolidated structured entities. The Company has determined that the underlying funds in which the Funds may invest are unconsolidated structured entities. This determination is based on the fact that decision making about the underlying funds is not governed by the voting right or other similar right held by the Funds. Similarly, investments in securitizations, asset-backed securities and mortgage-backed securities are determined to be interests in unconsolidated structured entities.

The Funds may invest in underlying funds whose investment objectives range from achieving short-term to long-term income and capital growth potential. Underlying funds may use leverage in a manner consistent with their respective investment objectives and as permitted by Canadian securities regulatory authorities. Underlying funds finance their operations by issuing redeemable units which are puttable at the holders' option and entitles the holder to a proportionate stake in the respective fund's Net Assets. The change in fair value of each of the underlying funds during the periods is included in "Change in unrealized appreciation (depreciation)" in the Statement of Comprehensive Income.

Mortgage-related securities are created from pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. Asset-backed securities are created from many types of assets, including auto loans, credit card receivables, home equity loans, and student loans.

The Funds do not provide and have not committed to providing any additional significant financial information or other support to the unconsolidated structured entities other than its investment in the unconsolidated structured entities.

Offsetting of financial assets and financial liabilities

Financial instruments are presented at net or gross amounts in the Statement of Financial Position depending on the existence of intention and legal right to offset opposite positions of such instruments held with the same counterparties. Amounts offset in the Statement of Financial Position are transactions for which the Funds have legally enforceable rights to offset and intend to settle the positions on a net basis. Amounts not offset in the Statement of Financial Position relate to transactions where a master netting arrangement or similar agreement is in place with a right to offset only in the event of default, insolvency or bankruptcy, or where the Funds have no intention of settling on a net basis.

4. Units and unit transactions

The withdrawable units of the Funds are classified as financial liabilities.

The units have no par value and are entitled to allocations, if any. Upon withdrawal, a unit is entitled to a proportionate share of the Fund's NAV. The Funds allocate their net income, including net realized capital gains and capital losses, to ensure the Funds will not be liable for income taxes on capital gains, dividends and interest. The Funds have no restrictions or specific capital requirements on the subscriptions and withdrawal of units. The relevant movements in withdrawable units are shown on the Statement of Changes in Net Assets Held for the Benefit of Policy owners. In accordance with their investment objectives and strategies, and the risk management practices outlined in Note 9, the Funds endeavor to invest the subscriptions received in appropriate investments, while maintaining sufficient liquidity to meet withdrawals, with such liquidity being augmented by short-term borrowings or disposal of investments where necessary.

The NAV per unit of a class is computed by dividing the NAV of the Fund attributable to the class (that is, the total fair value of the assets attributable to the class less the liabilities attributable to the class) by the total number of units of the class of the Fund outstanding at such time.

Expenses directly attributable to a class are charged to that class. Other expenses, income, realized and unrealized gains and losses from investment transactions are allocated proportionately to each class based upon the relative NAV of each class.

75/75 Class A Units are for policyholders that are professionals and business owners seeking downside risk protection and creditor protection.

75/100 Class A Units are for policyholders that are retirees and seniors seeking estate protection or wealth transfer advantages.

100/100 Class A Units are for policy holders that are pre-retirees looking for maximum protection and to lock-in market gains as they get closer to retirement. On June 21, 2016, Class A Units changed their name to 100/100 Class A Units.

100/100 Prestige Class Units are only available to policy owners who meet and maintain a minimum investment of \$250, either individually or collectively with other policy owners who are their family members and reside at the same address.

Holding Money Market Units was designated for holding purposes. Once a month the deposits were switched to the selected funds. At the close of business on June 20, 2016, the Holding Money Market Units were terminated.

5. Accounting standards issued but not yet adopted

Below are accounting standards issued or amended but not yet effective and not yet adopted. The Company does not expect the adoption of these standards or amendments to have a significant impact to the Funds' financial statements.

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments, which addresses classification and measurement, impairment and hedge accounting.

The new standard requires assets to be carried at amortized cost, FVTPL or fair value through comprehensive income based on the entity's business model for managing financial assets and the contractual cash flow characteristics of the financial asset. The classification and measurement of liabilities remains generally unchanged with the exception of liabilities recorded at FVTPL.

For these liabilities, fair value changes attributable to changes in the entity's own credit risk are to be presented in other comprehensive income unless they affect amounts recorded in income.

The new standard is effective for the Funds for their fiscal year beginning January 1, 2018. The Company is evaluating the impact of this standard on their financial statements.

6. Critical accounting judgements and estimates

The preparation of financial statements requires the use of judgement in applying the Funds' accounting policies and to make estimates and assumptions about the future. The following discusses the most significant accounting judgements and estimates that the Funds have made in preparing their financial statements:

Accounting judgements:

Functional and presentation currency

The Funds unitholders are mainly Canadian residents, with the subscriptions and redemptions of the redeemable units denominated in Canadian dollars. The Funds invest in Canadian dollar denominated securities. The performance of the Funds are measured and reported to the investors in Canadian dollars.

The Company considers the Canadian dollar as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The financial statements are presented in Canadian dollars, which is the Funds' functional and presentation currency.

Classification and measurement of financial instruments and application of fair value option

In classifying and measuring financial instruments held by the Funds, the Company is required to make significant judgements about whether or not the business of the Funds is to invest on a total return basis for the purpose of applying the fair value options for financial assets.

Accounting estimates:

The Funds have established policies and control procedures that are intended to ensure these judgements are well controlled, independently reviewed, and consistently applied from period to period. The estimates of the value of the Funds' assets and liabilities are believed to be appropriate as at the reporting date.

7. Management fees and expenses

Each Fund is responsible for the payment of fees and expenses related to its operations. Such fees and expenses include management fees and other recoverable fund operating expenses paid by the Funds. Collectively, all the fees and expenses paid or payable by the Funds, including management fees and other recoverable fund operating expenses divided by the Funds' average NAV, is known as the Management Expense Ratio ("MER").

8. Related party transactions

Management fees

Each Fund pays a management fee for investment management and administration services of the Fund. The management fee varies from Fund to Fund and is calculated and accrued on a daily basis as an annual percentage of the NAV of each Fund.

The management fee of a Fund includes the management fee and expenses charged by the underlying funds. There is no duplication of management fees when the Fund invests in an underlying fund.

Administration fees

Each Fund incurs certain operating expenses that include audit and legal fees and expenses; custodian and transfer agency fees; costs attributable to the administration of the segregated funds, including the cost of the record keeping system; fund accounting and valuation costs; costs of financial reports; including information folders, required to comply with applicable regulatory requirements; filing fees, and statements and communications to policyowners. The Company pays for these expenses and in return, each Fund pays the Company an administration fee of 0.25%. The administration fee is calculated and accrued daily as an annual percentage of the average NAV of each Fund.

Insurance fees

Each Fund pays an insurance fee for the provision of insurance benefits to the Company. The insurance fee differs from Fund to Fund and is calculated and accrued daily as an annual percentage of NAV of each Fund and is included in the management expense ratio.

Brokerage commissions

The Funds may execute trades with and or through BMO Nesbitt Burns Inc., an affiliate of the Company based on established standard brokerage agreements at market prices. These fees, if any, are included in "Commissions and other portfolio transaction costs" in the Statement of Comprehensive Income.

June 30, 2017

Other related parties

The Company may, on behalf of the Funds, enter into transactions or arrangements with or involving other subsidiaries or affiliates of the Bank of Montreal, or certain other persons or companies that are related or connected to the Company. These transactions or arrangements may include transactions or arrangements with or involving subsidiaries or affiliates of the Bank of Montreal, BMO Asset Management Inc., or other investment funds offered by Bank of Montreal, and may involve the purchase or sale of portfolio securities through or from a subsidiary or affiliates of the Bank of Montreal, the purchase or sale of securities issued or guaranteed by a subsidiary or affiliates of the Bank of Montreal, entering into forward contracts with a subsidiary or affiliates of the Bank of Montreal acting as the counterparty, the purchase or redemption of units of other Bank of Montreal investment funds or the provision of services to the Company.

9. Financial instrument risk

The Funds may be exposed to a variety of financial risks that are concentrated in their investment holdings. The concentration risk table groups securities by asset type, geographic region and/or market segment. The Funds' risk management practices outline the monitoring of compliance to investment guidelines. The Company manages the potential effects of these financial risks on the Funds' performance by employing and overseeing professional and experienced portfolio advisors that regularly monitor the Funds' positions, market events and diversify investment portfolios within the constraints of the investment guidelines.

Where a Fund invests in another investment fund or investment funds, they may be indirectly exposed to the financial instrument risk of the underlying fund(s), depending on the investment objectives and the type of securities held by the underlying fund(s). The decision to buy or sell an underlying fund is based on the investment guidelines and positions, rather than the exposure of the underlying funds.

a) Currency risk

Currency risk is the risk that the value of financial instruments denominated in currencies, other than the functional currency of the Funds, will fluctuate due to changes in foreign exchange rates. Investments in foreign markets are exposed to currency risk as the prices denominated in foreign currencies are converted to the Funds' functional currency in determining fair value.

b) Interest rate risk

Interest rate risk is the risk that the fair value of the Funds' interest bearing investments will fluctuate due to changes in market interest rates. The Funds' exposure to interest rate risk is concentrated in its investment in debt securities (such as bonds, money market investments, short-term investments and debentures) and interest rate derivative instruments, if any.

Other assets and liabilities are short-term in nature and/or non-interest bearing.

c) Other market risk

Other market risk is the risk that the fair value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in a market. Other assets and liabilities are monetary items that are short-term in nature, as such they are not subject to other market risk.

d) Credit risk

Credit risk is the risk that a loss could arise from a security issuer or counterparty to a financial instrument not being able to meet its financial obligations. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. Credit risk exposure for over-the-counter derivative instruments is based on the Funds' unrealized gain of the contractual obligations with the counterparty as at the reporting date. The credit exposure of other assets is represented by its carrying amount.

e) Liquidity risk

The Funds' exposure to liquidity risk is concentrated in the daily cash redemptions of units. The Funds primarily invest in securities that are traded in active markets and can be readily disposed. In addition, the Funds retain sufficient cash and cash equivalent positions to maintain liquidity. The Funds may, from time to time, enter into over-the-counter derivative contracts or invest in unlisted securities, which are not traded in an organized market and may be illiquid. The proportion of illiquid securities to NAV of the Fund is monitored by the Company to ensure it does not exceed the regulatory limit and does not significantly affect the liquidity required to meet the Fund's financial obligations.

10. Fair value hierarchy

Each Fund classifies its financial instruments into three levels based on the inputs used to value the financial instruments. Level 1 securities are valued based on the quoted prices in active markets for identical securities.

Level 2 securities are valued based on significant observable market inputs, such as quoted prices from similar securities and quoted prices in inactive markets or based on unobservable inputs to models.

Level 3 securities are valued based on significant unobservable inputs that reflect the Company's determination of assumptions that market participants might reasonably use in valuing the securities.
